

S-Series Cable Management

VS and HS Standard Capacity
Great performance for everyday installations

Hubbell's S-Series Cable Managers offer a space saving, yet robust performance for standard installations. The vertical cable managers have cable management spools that are easily moved to accommodate the best location for cable support. The horizontal cable managers have cable support fingers that align with Hubbell Premise Wiring's patch panels and therefore reduce cable kinks and strains. The entire S-series line can be installed in a single stand-alone rack or ganged together in any data center or telecommunication rooms.

VERTICAL FEATURES

- Steel construction
- Two (2) half-height pieces to ease installation
- Movable spools to prevent cable strain
- Hinged or clip-on doors
- Reduced width to save floor space

HORIZONTAL FEATURES

- Steel construction
- Clip-on covers
- Fingers align with cabling on patch panels

- Vertical channels clip onto HPW racks to simplify install
- Generous quantity of cable management spools allows every installation to be configured to cable demand
- Consistent design elements create an organized installation
